| in an approved vocational class on 9-20-2021 and dividing by 6 (cannot exceed 6 hours for   |  |                                     |   |   |                 |
| clock hours 983.1 ÷ 6 =   | 163.8500 (Record of                                | on Line 6)                          |   |   |                 |
| (d) In order to access new facilities weighting, a USD must have adopted at least a 25% LOI<br>prior to July 1, 2015 and bond money was used for construction of new facilities or new s<br>on a military reservation located on USD 207 and USD 475.   |  |                                     |   |   |                 |

(e) Preschool-Aged At-Risk (4 yr old) students are counted as .5 FTE. USD must be approved by the Kansas State Department of Education.

(f) Comes from form 118 (line 20).

(NOTE: If September 20 falls on a weekend, the following Monday will be the official count date.)

 Kansas State Department of Education
 USD #202

 Form 0-135-150
 6/2021

ADDITIONAL DEFINITION FOR SCHOOL FACILITIES (Must use a minimum LOB listed below to qualify for this provision.)

e) School Facilities Definition - School facilities weighting is available for school districts whose adopted local option budget (LOB) is at least 25% for 2014-15 and have constructed an entirely new facility or an addition to an existing facility. Only eligible to schools that had a bond election prior to July 1, 2015 and bond money was used for construction of new facilities or new schools that were built primarily with federal funds on a military reservation located on USD 207 or USD 475.

The determination of weighting will be based upon the number of full-time equivalent (FTE) students that are enrolled and attending in the new facility September 20 (and February 20 for districts qualifying under K.S.A. 72-5139). In the case of school districts that have constructed an addition to existing facilities, the number of students that are enrolled and attending in the new classroom facility will be counted on a full-time equivalent basis (see example 2.) The additional weighting for this provision of the law is applicable for two years only. For a new facility, the FTE is for the entire building (see example 1). For additions to an existing facility, the following calculation would be utilized.

### Example #1: (For new buildings.)

For a totally new constructed building, the FTE equals the total enrollment FTE for that building.

|                        | <u>Headcount</u> | <u>FTE</u>                                |
|------------------------|------------------|---|
| Kindergarten           | 77               | 77.0                                      |
| Grade 1                | 87               | 87.0                                      |
| Grade 2                | 81               | 81.0                                      |
| Grade 3                | 75               | 75.0                                      |
| Weighting for example: |                  | 320.0 x 0.25 = 80.0 x \$4,706 = \$376,480 |

### Example #2: (For new additions)

|          | Total number of students in each new classroom<br>Number of class periods (divide by)<br>Full-time equivalent enrollment = |      | ·<br>·               |
|----------|--|------|----------------------|
| Example: | New classroom A =  | 105  | students for the day |
|          | New classroom B =  | 154  | students for the day |
|          | New classroom C =  | 133  | students for the day |
|          | New classroom D =  | 121  | students for the day |
|          | TOTAL =  | 513  | •                    |
|          | divide by  | 7    | class periods        |
|          | ÷  | 73.3 | FTE                  |

Weighting for above example: 73.3 X 0.25 = 18.3 X \$4,706 = \$86,237

### Qualifying for the 3yr Average (Goes to Table I)
