While waiting to be picked up, the student will be isolated from other children. Children will be excluded for 10 days following the first appearance of symptoms and must fever free for 72 hours without medicine.</li><li>● When there is confirmation that a person infected with COVID-19 was in a school building, the school will contact the local health department immediately. As one option, the school will close the school building for a minimum of two to five days and work with the local health department to assess factors, such as the likelihood of exposure to employees and students in the building, the number of cases in the community and other factors that will determine when the building should reopen. While the school building is closed, all school activities will be cancelled or rescheduled, regardless of whether the activity was to take place in the building or another location, including extracurricular activities, before and after-school programs and field trips. Parents/students and employees will be encouraged to stay at home until more information is provided by the school or the health department.</li><li>● As another option, the school may remain open but block off areas where the person infected with COVID-19 was in the school building until the area has been cleaned thoroughly. The school should work with the local health department to assess for close contacts between students and staff and inform those who are exposed that they must start a mandatory 14-day quarantine period.</li><li>● The school will contact parents/students and employees and notify them that a person who tested positive for COVID-19 was in the building and encourage cooperation with the school and the local health department to trace contacts with the individual. The individual who tested positive will not be identified in communications to the school community at large.</li></ul>
